

# Intelligent Capture Readiness & Value Checklist

Paperwise Symphony Intelligent Capture is a next-generation document capture and processing solution designed to eliminate manual data entry, reduce errors, and streamline how information moves through your business.

Using advanced document recognition and intelligent data extraction, Intelligent Capture automatically classifies documents, extracts key data, validates information, and routes it directly into your Paperwise workflows, without the bottlenecks of traditional scanning and indexing.

Whether documents arrive via scan, email, or digital upload, Intelligent Capture ensures the right data gets to the right place, faster and more accurately than ever before.

## KEY BUSINESS BENEFITS

- **Accelerate Processing Times:** Automate document classification and data extraction to move work through your organization faster and with fewer delays.
- **Reduce Manual Data Entry & Errors:** Eliminate repetitive indexing tasks and minimize human error with intelligent, rules-based capture and validation.
- **Improve Workflow Efficiency:** Feed clean, structured data directly into Paperwise workflows for approvals, routing, and downstream processes.
- **Increase Visibility & Control:** Gain consistency across document intake while maintaining auditability and compliance.

## KEY BUSINESS BENEFITS

As part of this webinar, Paperwise is offering a no-cost Business Process Assessment for our clients.

During this assessment, we will:

- Review your current document workflow and intake process
- Identify automation opportunities and inefficiencies
- Test a group of your sample documents using Symphony Intelligent Capture
- Demonstrate how your documents can be automatically processed, classified, and routed using the new solution

This personalized assessment allows you to see exactly how Intelligent Capture would work with your documents and your workflows, before making any decisions.

**Schedule an assessment with our team today.**
