

The Data Entry Cost Audit

A FREE 45-Minute Assessment for Manufacturing Companies

Find out exactly how many production hours and dollars your team is losing to manual data entry – we'll show you in 45 minutes, free.

WHAT YOU RECEIVE – FREE

- 1 Production Document Cost Report**
Your estimated annual labor cost tied to manually processing work orders, POs, and inspection forms.
- 2 Document Bottleneck Map**
Your top 3 highest-impact capture pain points across procurement, AP, and production operations.
- 3 AI Readiness Score**
A custom score showing where intelligent capture delivers your fastest throughput and cost ROI.

PAIN POINTS WE UNCOVER IN MANUFACTURING

- Work orders and quality inspection reports manually re-keyed into ERP systems daily – draining skilled labor hours and slowing throughput
- AP teams manually processing supplier invoices with no automated PO matching – leading to delays, overpayments, and duplicate entries
- Purchase orders and vendor invoices require manual 3-way matching against receipts and ERP records, creating bottlenecks in month-end close
- Supplier invoices, packing slips, and receiving documents entered by hand with no ERP integration – disconnecting procurement from accounts payable
- Compliance and audit risk from incomplete or illegible paper-based records across receiving, QA, and AP departments

60%

of manufacturers cite manual data entry as a top bottleneck

\$12-35

avg. cost to manually process one AP document

2-4 hrs

daily ERP re-keying time per admin employee
