

# The Freight Document Audit

Free 45-Minute Assessment for Transportation Companies

Find out exactly how many driver hours and freight dollars your team is losing to manual data entry – we'll show you in 45 minutes, free.

## WHAT YOU RECEIVE – FREE

- 1 Freight Document Cost Report**  
Your estimated annual labor cost tied to manually processing bills of lading, PODs, and freight invoices.
- 2 Document Bottleneck Map**  
Your top 3 highest-impact capture pain points across dispatch, AP, and compliance operations.
- 3 AI Readiness Score**  
A custom score showing where intelligent capture delivers your fastest cost-per-load ROI.

## PAIN POINTS WE UNCOVER IN MANUFACTURING

- Bills of lading, proof-of-delivery, and rate confirmations manually re-keyed into TMS systems – costing hours per driver per week
- Billing delays from document backlogs push cash flow cycles from days into weeks, straining working capital
- AP teams manually matching freight invoices to POs and load records – creating bottlenecks, duplicate payments, and audit risk
- Carrier invoices and fuel surcharges re-entered into ERP and accounting systems by hand, with no automated 3-way PO match
- Compliance and audit exposure from handwritten or incomplete carrier documents that slip through manual review

**67%**

of carriers still process freight docs manually

**\$18-42**

avg. cost to manually process one freight doc

**3-5 days**

typical billing delay from document backlogs

**80%+**

reduction in AP data entry time with AI capture
